## SmartBorder eManifest (ACE & ACI)

Since 2007, SmartBorder has supported thousands of highway carriers, freight forwarders, importers, and exporters with an efficient, cost-effective solution for managing ACE eManifest compliance.

With the introduction of Canada's Advance Commercial Information (ACI) eManifest initiative, SmartBorder's technology offerings can now help you stay compliant on both sides of the U.S. - Canada border.

### Our Technology Solution

SmartBorder's SaaS-based application allows you to handle the additional workload of meeting CBP and CBSA's stringent manifest requirements with minimal need for additional resources or significant expenditure. Backed by our industry-leading training and support, 24 hours a day, 7 days a week, carriers and brokers across North America can rely on SmartBorder eManifest to adapt to these new obligations quickly and without stress.

### How You'll Benefit

- **Make smarter decisions.** Dig deeper with real-time reports that anyone can create.
- **Save time.** With our "pick and click" feature, you can set up SmartBorder with all the necessary information prior to creating any trips, and reuse that data as needed.
- **Get it right the first time.** With hundreds of data checks, more keying errors are caught before information is ever sent to CBSA.
- **Stay in the loop.** With real-time feeds, you get immediate views of the status of a current trip or shipment without having to navigate through several screens. Receive emails or SMS notifications including ready to arrive.
- **Data integration that works for you.** Flexible data integration options that give you the ability to integrate with our systems using EDI or web services.
- **Stay current.** With our cutting-edge technology, you'll always have the latest version of SmartBorder every time you log in.
- **Easily resolve problems** with our intuitive Transmission Viewer with Integrated Help for fixing CBSA or CBP rejects.

#### Key Features

- EDI Integration from freight forwarding and other applications (supporting files such as flatfile, x12, edifact, etc.)
- Template capability that reduces redundant keying by automatically populating frequently used fields
- Data validation functionality, which ensures accurate data in every submission
- Minimal internal IT support or investment
- Highlighted fields for identifying required sections
- Pick-lists to automatically pull up a menu of all your shippers, consignees, products, trucks, and trailers
- Auto creation of pick-lists from data imported in an Excel file
- Direct connection to the CBSA and CBP networks for quick approval
- Fully brandable for brokers, 3PLs and software resellers
- System messaging from our support staff to notify you of any CBSA issues
- Permanent storage of all transaction records and properties
- Embedded training videos
- Unlimited user access from any computer with an internet connection
- Next generation software technologies for higher speed and quality
- Dashboard views show recent trips and shipments
- Customizable trip and shipment watchlists
- System defaults for faster trips and shipments
- Support from experienced industry professionals

#### About SmartBorder

SmartBorder is a powerful, SaaS ("Software-as-a-Service," also known as ASP) application that does one thing and does it better than any other solution on the market - it facilitates time-saving, Customs-compliant importation of goods into Canada and the United States.

SmartBorder not only meets the filing requirements, but also provides additional benefits to your cross-border shipping process. The SmartBorder suite of eManifest products fit your business needs, including full or partial EDI integration into your freight or ERP systems.

Contact us today to find out more about SmartBorder eManifest technology solutions or set up an online demo.
